**Detailed description, further notes, observations – continued on next page**

Two structures in a small glen with a burn.

1: NM5253263389 - A small shieling hut, 2.5m diameter.

2: NM5259163349 - A small structure in a hollow beside the burn, at the base of a waterfall, which might be a stone shelter. A low wall protects it from flooding on the upstream and stream sides. This may be an illicit whisky still, with the square structure the hearth.

**Present land use**

Rough grazing
