Detailed description, further notes, observations – *continued on next page*

Substantial large number of stones, in places several stones in height, arranged in a continuous circle with possible stone chamber to north side. In reasonable state of preservation. Situated in sheltered position, approx 100 metres from the shore. We presume this is a hut circle, diameter of original hut about 8m but 10m including talus slope – see map.

HER have registered the field workings around the site but not the stone circle.

Possibly Bronze Age.

Present land use

Rough grazing

Past land use

Present vegetation cover

Bracken and grass

Nearby monuments or associated features

Rubha na h-Uamha Dun to the west
Eilagadale settlement to the south-east

Topography

Rocky outcrops and grassy patches
